

Arizona Weekly Enterprise

FLORENCE, SATURDAY, JUL. 1, 1922

Arrival and Departure of Mails.

Eastern and California Mail arrives at 11:30 a. m. and closes at 2:30 p. m.
Pinal, Globe and Silver King Mail arrives at 12 m. and closes at 12:15 p. m.

Office Hours—From 9 a. m. to 1 p. m.; from 1:30 p. m. to 5 p. m. and from 6 p. m. to 7 p. m. Sundays from 11 a. m. to 3 p. m.

Home News.

Mr. Sherwood returned from Pinal this week.
Horace G. Smith returned from Tucson this week.

Mr. Mat. Caviness was registered at the Silver King Wednesday.

Mr. William Bley came down from Butte Wednesday, and went up to Pinal.

The First National Bank of Tucson has been designated as a United States Depository.

The Board of Supervisors will be in session this week. It is the regular quarterly meeting.

The English brothers returned from California Tuesday. They went thither some weeks since with their families.

Mr. and Mrs. Davis and Mrs. Whitlow, of Whitlow's station, spent the week with Mrs. W. L. Bailey, at the Silver King.

Judge Daniel H. Penny, who succeeds De Forest Porter as Judge of the Second Judicial District of Arizona, is a Democrat.

The Uncle Dave mine, of the Gila district, could send a magnificent exhibit of ore to the Denver Exposition. It should be represented.

Messrs. Smith & Murray delivered forty thousand pounds of machinery at Silver King last week for the Bilk and Mowrey Company.

The Ryland circus returned from Phoenix this week, but did not pitch their tent here. The trained steers have grown too lean to be attractive.

We were pleased to meet at our sanctum this week Mr. Robert Conn, of Pinal. He came down to meet his wife, who was on her way here from California.

A Mexican was brought before Judge Miller Monday on a charge of attempted rape, but the evidence did not justify the charge and the accused was released.

Two bars of bullion from the Mountain View mine were sent down to Casa Grande last week. The ore was reduced at the Seventy-six mill, located at Pinal.

The harvest is over in the Gila valley and the threshing machine is at work. The valley has never produced a better crop, and our farmers are feeling jubilant over the fact.

The Pinal Consolidated and the Jessie Benton Consolidated should wheel into line with the King and the Velox at the Denver Exposition. Both of the former properties could make a splendid showing.

Luddy, one of the Pioneer types of Arizona, passed through here Wednesday en route to Prescott from Globe. He is on his tenth annual tour of the Territory. Like old wine, he improves with age, and looks well.

Attention is invited to the professional card of Mr. Charles G. Johnston, who has located in Florence in the practice of law. He will practice in all the courts of the Territory, and is an experienced and able attorney.

John Moss will open a fruit stand on the picnic grounds on the Fourth, and stock it with a good assortment of California fruit. The fruit in our valley is not ready for the market yet, hence his importation of California fruit.

J. W. Reynolds has returned to Pinal, with the intention of burning lime for the Pinal and Florence markets. He will deliver lime at the latter place for 25 cents per pound, and at Pinal for 2 cents per pound. He makes a No. 1 article.

The South Pioneer Company have arranged to send a very handsome specimen of ore from their mine to the Denver Exposition. It is a large cone-shaped piece of ore, showing a quantity of silver. It will be a good advertisement for the property.

San Juan's day passed by more quietly than usual this year. For the first time within the history of the town our Mexican population ignored their national custom of "riding for the rooster," and the number of "drunks" was moderate in comparison with that of former years.

Frank Fitch, a member of the Globe bar, was in town this week. He is a late acquisition to the benedictine brotherhood and wears his honors gracefully. And, strange to say, considering the high temperature of an Arizona summer, he is growing corpulent since he took on the yoke of conjugal slavery.

Eleven thousand pounds of assorted ore from the South Pioneer were hauled down to Casa Grande last week and shipped to San Francisco. It was rich in chlorides and native silver, and will go several thousand dollars to the ton. The Pioneer will be a strong and regular bullion producer as soon as the company's new stamp mill shall have been completed.

John Olney, who has been prospecting through the more southern part of the Territory, writes from Oracle camp that he means to return to Mineral Hill, as the properties there suit him better than anything he has found. He advises the boys to camp in the latter district and wait for the boom that is sure to come in sooner or later.

An Indian prisoner arrived here by stage Tuesday from Casa Grande. He had been committed for sixty days by Justice Loe. His offense was an attempt to cross the life out of one of the dusky daughters of his tribe who had picked him in some way. He will probably be tried again and committed to await the action of the grand jury, as his crime is an indictable offense and beyond the jurisdiction of a Justice's court.

Frank Fitch, of Globe, and Mr. Chas. G. Johnston, of this place, have been retained to defend Shoot-Em-Up-Dick. The latter seems to have some very good friends somewhere in the East, and they have sent \$800 through Wells, Fargo & Co. to bail him out. But the court has increased the amount of the bail to \$2,500, and he still takes his meals within the walls of a chilled steel cell.

We do not like to insinuate that our friend Tillman is on the verge of committing a rash and desperate act, but there is strong circumstantial evidence to warrant us in so stating. When a bachelor is seen sitting in his room, practicing the art of rocking a baby cradle it is fair to presume that he is not simply amusing himself, but is preparing for an event that casts its shadow before.

Mr. Fred R. Kittle, of Fremont, Nebraska, arrived here Sunday to accept a position on the EXTERRETTA as collector, solicitor and printer. He rendered us excellent service in this line in Nebraska, and thoroughly understands the business. Besides this, he is an agreeable, sober and reliable young man, and we commend him to the good graces of our citizens.

Mr. Dennis, brother of ex-Superintendent Dennis, of the Pinal Consolidated, has resigned his position as foreman at the mines and returned to San Francisco. He was pleased with the mines of this county, and thinks he may return some day to secure an interest in some of them. Every man possessing practical mining knowledge, who has examined our properties, expresses confidence in their richness and permanence.

Jeane Hardesty is driving ahead development work on the Cholla group at Mineral Hill. He has conceived a new and lasting love for that camp since he returned from an extensive prospecting tour in other districts. There are but few districts as good, and none better than Mineral Hill. We have pinned our faith to that camp, and time will demonstrate that we have not erred. The mines of the Pinal Consolidated are in that belt, and no properties in Arizona give promise of greater value than do these mines.

The Reward mine, better known as the Chilson property, and located in the Casa Grande district, is developing into a splendid property under the intelligent exploration work of the superintendent. Persons who have examined the workings recently inform us that it has the look of a bonanza equal to the Velox. That district is showing up some of the best mines in the Territory, and continues to attract much attention. It has some very high grade veins, and is destined to become a great bullion producing section.

Fred Adams, Dan Crocker and Charlie Palmer returned from the Casa Grande district this week. They brought with them some very handsome and remarkably rich specimens of ore from the Silver Belle. The samples in question are thoroughly impregnated with chloride and show large nuggets of malleable silver. One specimen taken from the bottom of the ninety-foot shaft carries considerable gold. Considering the meagre developments on the Belle, it makes a remarkable showing, and there can be no doubt as to its future.

The new smelters at the Pinal Consolidated will encounter no difficulty in smelting the ore when they once get the furnace fairly under headway, and claim that they will turn out bullion in quantities that will silence the most persistent croakers. We have had no doubts of the latter since we explored the company's mines and examined their mammoth ore resources. If they do not turn out bullion by the ton it will be on account of failure in the treatment of the ore, and not for want of the latter.

The Democratic primary election held at the Court-house last Saturday resulted in the election of the following delegates to the County Convention: John T. Bartleson, Dr. Harvey, W. C. Smith, John Miller, Thos. F. Weedin. The County Convention will meet at Florence July 8th, and will send a solid Oury delegation to Phoenix. A full representation at the County Convention is desired, and each of the districts named in the call should send the full number of delegates allowed to it.

Last Saturday was Mr. John B. Reamy's fifty-fourth birthday, and he entertained a number of friends who called to present their congratulations and wish him "many happy returns of the day." The dinner, prepared by his wife and daughter, Mrs. E. C. Lanoue, was a treat rarely to be met with on such occasions. The bill of fare included everything tempting in the edible line. The feast was rounded up with claret, abundant in quantity and superb in quality. The afternoon hours were devoted to music and dancing and social converse. It was an informal gathering, but an exceedingly pleasant one.

A young gentleman, whose name we could not learn, is making arrangements for the purchase of land in the valley below town, with the intention of planting ten acres in grapes next spring. People are beginning to appreciate the adaptability of our soil and climate to the growth of grapes, and it is safe to predict that a few years hence the wine industry will be one of the most important factors in our prosperity. If all those who have signified their intention of planting grape cuttings next spring keep to their promise the acreage in vineyard will be doubled in this valley, and grape culture will have been increased in earnest.

The rumor current upon the streets last week to the effect that Judge Silent was settling up the claims against the old Pinal Copper Company, and that the latter corporation would resume operations, has been confirmed. This will be good news not only to the numerous stockholders of the company, but to our people generally, who believed the failure of the enterprise was directly chargeable to mismanagement, and not to lack of merit in the company's mine. It is to be hoped that the new management will be characterized by more wisdom and by more sincerity of purpose than was the last, and it doubtless will be. The large owners in the company are men who profit by experience, and will keep a close watch over the managers of this property from this time on.

Just as we were preparing to go to press the telegraph informed us that the Pinal Consolidated smelter had been running forty-eight hours, at half capacity, and had turned out 22,000 pounds of bullion. The furnace had not been started at its full capacity owing to the limited amount of charcoal on hand. As soon as the company can secure an unlimited supply of charcoal they will turn out sixteen tons of bullion every twenty-four hours with their present facilities, and they purpose increasing the latter this fall.

The enterprising Superintendent of the Silver King has decided to make an exhibit of that mine's wonderful ore at the Denver Exposition. He will send five hundred pounds of choice specimens that will astonish the miners of the Centennial State and other sections. Mr. A. H. Elliott, of Casa Grande, will have charge of the King exhibit. He will probably take with him some good exhibits from the Casa Grande district. That district has some fabulously rich ore and could make a good showing.

Mrs. W. L. Bailey, who is one of the most public spirited ladies in the county, has undertaken the task of waking up the Florentines on the subject of a Fourth of July picnic. That she will succeed is a foregone conclusion, and amusement lovers may prepare for a good time. She is collecting money with which to purchase ices and fruits, and ropes for swings, etc. A basket dinner will be served, and music will be in attendance for the benefit of those who may desire to pay their respects to Terpsichore. The picnic will take place under the cottonwoods near Treasurer Brady's mill. The trial of speed at the racetrack will take place in the forenoon, so there will be an opportunity to attend both the races and the picnic. All our citizens should lend a helping hand and make the occasion worthy of the day and the town.

The proposition to build a commodious school house and establish a graded school here meets with favor, and we believe there would be no difficulty in securing the former if the school board would prepare an estimate of the cost and issue a call for a special election. Our people recognize the necessity of such an improvement and the advantage it would be to our town. Hence we believe the negative votes would be few. Our only interest in urging the matter is the interest we feel in the future of Florence. We have no children to educate, but will cheerfully pay our pro rata of the tax, in the belief that the best way to build up our town is to make it attractive to families by offering them good educational privileges in addition to the many natural advantages our location possesses. Since the above was in type the board has issued a call for a special election.

We desire once more to call the attention of our mine owners to the importance of an exhibit at the Denver Exposition. The merchant must make known his wares if he expects to sell, and the same is true of the miner. We may have the best mines in the world, but cannot secure capital to develop them unless we bring them to the attention of mining men of means. The Denver Exposition affords us an opportunity to do this in an effective manner. If we neglect the opportunity our more enterprising neighbors, whose properties have less real merit than ours, will lead us in the march of progress and become boasting mining centers while Pinal county remains comparatively unknown. The time for preparing an exhibit is short, as the exposition opens on the 1st of August, and we must hasten to make our exhibit a display worthy of this matchless county.

Mr. W. J. Stevens, of Eureka, Nevada, is to be the superintendent of the Pinal Consolidated, and is now at Butte. Mr. Henry Donnelly only assumed the superintendency temporarily to get the furnace under headway. He is too well provided with this world's goods to deny himself home comforts for the sake of a superintendent's salary. He is one of California's millionaires. Mr. Stevens is an experienced Nevada miner and smelter, and the mines and furnace will be intelligently and successfully handled under his management. The starting of the furnace has been delayed on account of the difficulty experienced in procuring an adequate supply of charcoal. The company contracted with Leo Goldman & Co. for fifty thousand bushels of charcoal, but the men Mr. Goldman engaged to burn it did not understand the business and burned up several of the largest kilns. It requires skill to burn charcoal from cottonwood.

Last Saturday evening Col. P. R. Brady's beautiful home in the valley below Florence was the scene of the first moonlight party of the season, and it was one of the most thoroughly enjoyable parties it has been our privilege to attend since reaching Apache land. There were one hundred and three persons present by actual count, and the spirit of good nature and jollity seemed to pervade the entire assembly. The grounds in front of the house and under the shadow of the large ash trees had been cleared off and leveled down for the occasion. They were illuminated by the glow of lanterns and by the moonlight, which touched with luscious pencil the virent trees. The temperature was delightful, and made the dancing pleasant. Refreshments were served from platters, and the host and hostess spared no effort that would contribute to the comfort and enjoyment of their guests. The throng dispersed at 2 a. m. well pleased with their evening's amusement, and will treasure the event among their pleasantest recollections.

Casa Grande Enterprise.
At a town meeting of the citizens of Casa Grande, held last Tuesday evening, it was determined to build a house to be used for school and other public purposes, and Fryer, Loss and Tomlinson were appointed as an executive committee to carry the matter to a successful termination. They report about \$600 as being already subscribed, and feel that nothing will prevent the erection of a suitable building, and that in less than three months the school will be in session. The school is a move in the right direction, and is characteristic of the enterprise of the town. There are more than twenty children waiting anxiously for school to open, and it is confidently expected that they will be enjoying the best of educational privileges when the heat of summer shall have passed.

Mining Notes.

The Old Guard is now shipping ore to the Boston mill. Between 400 and 500 tons of rich chlorides and carbonate are now on the dump, and the mine is producing from 15 to 20 tons daily. This valuable mine is now added to the list of regular bullion producers. It is more than likely that a new mill will shortly be erected on the Randolph. Mr. J. Brewster, the secretary of the company, is now here making all necessary arrangements. Steadily improvement is the order of the day in the mining world of Tombstone. Many properties hitherto neglected are developing into valuable mines, while the leading claims on Contention hill are showing splendidly and turning out their usual quantity of ore. The mills all along the San Pedro keep up their unceasing rattle day and night, and the bullion yield for June will be up to the usual standard. Below we give the very latest from the leading mines throughout the district:

TOMBSTONE M. AND M. CO.—An extensive strike of high grade ore was made within the past week in both the east and west ends of the Goodenough. The ore is of a very fine quality and promises to develop into an extensive ore body. For some time back Professor Church had been driving for it, and feels somewhat confident to have his ideas so thoroughly borne out. The West Side is also looking very well and turning out some nice ore. One of the ore bins has been removed to this mine during the week.

CHAS. CENTRAL.—The south drift in the 400 level shows a big improvement, carrying vastly more gold than heretofore. On the 500 and 600 levels the drifts remain about the same. The east end, on the 600 is now in about 210 feet, and is progressing more rapidly than formerly, the ground not being so hard. The steps all through the mine are looking well and producing the usual amount of ore. The 200 level is now in about 100 feet, and is progressing more rapidly than formerly, the ground not being so hard. The steps all through the mine are looking well and producing the usual amount of ore. The 200 level is now in about 100 feet, and is progressing more rapidly than formerly, the ground not being so hard. The steps all through the mine are looking well and producing the usual amount of ore.

THE GOOD SAMARITAN.—The south drift in the 230 level is being vigorously driven, also the north drift on the 80-foot level. A drift has been started from the mine connecting the 80 and 230 levels. Some fine ore is being taken out of the mine, and it is now opened up so that large quantities of ore can be extracted. The Good Samaritan drifts have been started from the 300 level, and are now in about 26 feet. The mine between the 200 and 250 levels will be finished in a few days. Sinking on the main shaft will be commenced again today. As soon as connection is made by the mine above referred to a crosscut will be started south from the 150. The mine is in an excellent condition, and getting to look better daily.

THE SNOOK.—In consequence of the ore trains being at work hauling Old Guard ore, the night shift at this place has been knocked off for four days. The work mentioned in our last issue is being continued, and everything looks encouraging. **THE EAGLE.**—Work is continued here on the main incline, following the ledge. The management are preparing for active developments and the mine is looking good. At 105 feet a new drift will be cut out and drifts started both ways. **THE CONTENTION.**—Superintendent White having but recently arrived in town after a protracted absence was not prepared to give much information concerning the mine until next week. Everything, however, is running along all right, and the work heretofore reported are continued. **THE RANDOLPH.**—No new developments in the crosscut from the 400 level to the 200 level. The crosscut from the main level at shaft No. 1 struck a fine vein of very high grade ore nineteen feet from the level. Mine No. 3 has been started on the vein and is now down eight feet in a fine body of ore. Winze No. 2 from the first level is down 60 feet on the vein. At this point the foot wall turned perpendicular, and they are now driving for the hanging wall, and have now twelve feet in ore. The ore extracted at this point has assayed from \$200 to \$1,200 and gives strong indications of staying qualities. Mr. J. Brewster, of Bloomington, Illinois, the secretary of the company, is now here negotiating and making arrangements for the erection of a mill. **Epitaph.**

Our predictions of last week in regard to the capabilities of the old Globe mine and smelter are being satisfactorily realized. Although the furnace was not tractable for the first few days as it should have been, it now shows a sense of doing its duty to the entire satisfaction of every person concerned. During the preceding twenty-four hours 19,000 pounds of iron was produced, and to-day 84,000 pounds of copper pigs will leave the furnace for the East. At the rate the furnace is now producing we may look for 570,000 pounds of copper per month. C. P. Putnam and brother will shortly commence work on the Little Putnam, a promising silver prospect adjacent to the Little Giant. It is reported that the River road is now in the hands of Judge Silent, who has assumed all liabilities. **Work on the Monarch at the depth of 85 feet was suspended on account of the high temperature in the shaft, there being no ventilation. Copper ore from the surface to the bottom of the shaft.** **The Coyote, a copper property on the Gila, six miles from Riverside, has been bonded to parties who have agreed to pay a visit to the shaft. The work is progressing, and at fourteen feet the shaft is entirely in ore.** **The Pennsylvania, at Riverside, has been sold by Haskin and Bibb to Eastern capitalists, and will be worked by the syndicate purchasing it.** **Silver Belt.**

Work at Copper Mountain is progressing finely, and the fine large body of carbonate ore that is daily placed on the dump is a sure cure for the eye. As work progresses they are constantly striking the old shafts, drifts and inclines left to denote the presence of the Aztec miners who worked this property in some former age, and during the past week they have found some of the stone hammers that were undoubtedly used by the pre-historic race in extracting the ore, and we will say for our part, after having a glimpse at the implements they used in this work, that it must have been more difficult work than it is for a rich man to enter the kingdom of heaven. These tools can be seen at any time by the curious if they choose to pay a visit to the camp of Messrs. Tatt and Stoddard on the Agua Fria. A shot was put off in this mine last Tuesday that blew out four tons of ore. Mr. Tatt and Stoddard are now running, having successfully started three weeks ago. It is handling about 34 tons of ore, and is giving excellent satisfaction. **Chronicle.**

Notice of Guardian's Sale of Real Estate.

Notice is hereby given that in pursuance of an order of the Probate Court of the county of Pinal, Territory of Arizona, made on the 15th day of April, A.
